Feb. 15-17—Parent Conferences

Feb. 17— Spelling Bee

Feb. 24—G3 Assembly

2nd Quarter Finished!

Dear Grade 3 students and parents,

This quarter we welcomed a new student to our class, Tent it is very nice to have you join us in our classroom. Students worked hard to prepare for their exams and enjoyed celebrating the end of exams with Ink's birthday!

This quarter students had a great time learning about space. We visited the school's planetarium and took a field trip to the moon! Students learned and did projects about constellations and their myths, and they also wrote their own imaginative stories about their constellation of choice. They will soon be working in partners to do a project about the planets in our solar system. In math, we have been learning data management and different ways to collect and organize information. Students will soon be doing a project where they will conduct their own survey and display their data using different charts and graphs. Several students are quite excited to begin multiplication in the third quarter. In social studies, we learned about English settlers coming to America and meeting the Native Americans. In class, we watched the movie Pocahontas and the students decided they would like to act out this play for our Grade 3 assembly. We hope you will come and watch our show!

Shadow tracing to learn about Earth's rotation.

Carnivores for Predator and Prey

Winners of the Christmas decoration contest. Pizza Party!!!
