

February 2012

GRADE 7 NEWSLETTER

Dear students & parents,

We had a very good start in 2012! After a well-deserved holiday we came back to school refreshed and ready to do more work. Now that the Quarter 2 examination period is over, we'll start looking into new topics.

In **Language Arts** the students will concentrate both reading and grammar. We'll look at the following topics: pronouns and antecedents.

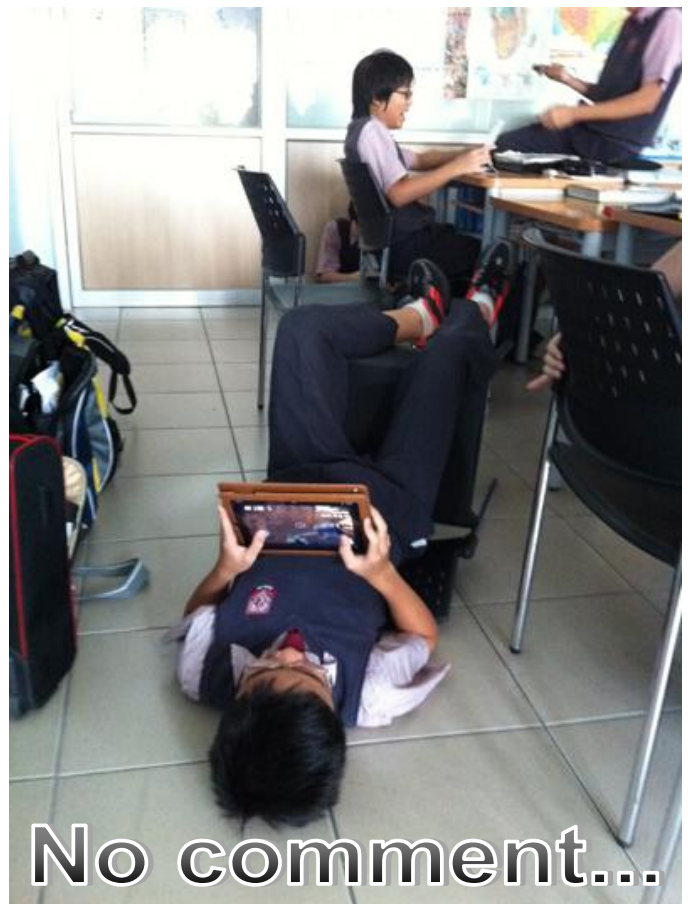

In **Science** we will start a new chapter about plants. Every Wednesday we will go to the science lab where we try to apply the theories we've learned in class during the previous lessons.

In **Mathematics** we will look at operations with square roots and will begin studying the basics of geometry (angles).

In **Social Studies** will concentrate on the modern history and geography of major countries in Western and Eastern Europe.

Upcoming events:

- **30 Jan - 3 Feb:** Career Week (I will talk about famous writers who used to be teachers.)
- **15-17 Feb:** Parent-Teacher Conferences

All the best,
V.M. Simandan
