Science question of the week!

Why is the force of gravity different on different planets?

Student council

Student council have made and sold student diaries.

They would like to encourage students to keep using them to help with their studies.

Sabrina's farewell message—"my experience has been positive and enlightening"

"Due to the small numbers of students in my class I received a lot of attention which made me focus and understand my studies. Whenever I had a question my teachers were right there to help me. I really appreciate having the experience of KPIS and I think a lot more foreigners should come and have the same experience I had."
